

ISIDORE
Hands-free door opening

by

Alea

Hygienic hands-free door handle

Exceptional and seasonal outbreaks compel us to reinforce sanitary measures. ISIDORE is a simple, durable and cost-effective way to reduce the circulation of pathogenic agents spread through hand-to-handle contact. It contributes to reinforcing the efficacy of sanitary measures simply and durably, by enabling hands-free door use.

DESIGNED, DEVELOPED
AND PRODUCED IN FRANCE

STOP COVID-19

www.isidore-protect.com

MECHANICAL DOOR OPENING AND CLOSING DEVICE

100% hands-free

ISIDORE allows the opening and closing of doors using one's elbow or forearm, thus avoiding hand-to-handle contact, which is the first vector of transmission of viral diseases.

Hygienic

ISIDORE is a must-have as part of a sanitary protection approach. It easily limits the spread of Covid-19 and other pathogens (such as seasonal flu and gastroenteritis outbreaks).

Durable

ISIDORE is made of machined solid aluminum, which makes it hard-wearing and durable, thereby limiting its environmental impact.

Sleek, stylish design

ISIDORE easily blends into any type of space and decor thanks to its minimal design. Suitable to all types of environments (residential, business and public premises), ISIDORE is available in different color variations.

Universal

ISIDORE fits most door handles thanks to its universal clamping system.

Convenient

ISIDORE is easily and quickly installed, taking only 3 minutes, with no damage to your door and handle. The 2 screws and the Allen key are included.

EASY-CARE

ISIDORE is easily cleaned and sanitized. Its smooth aluminum surface tolerates customary cleaning agents.

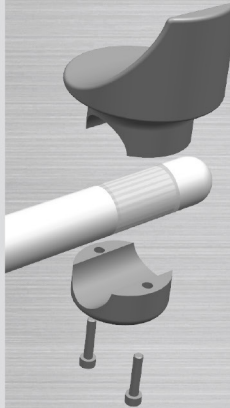

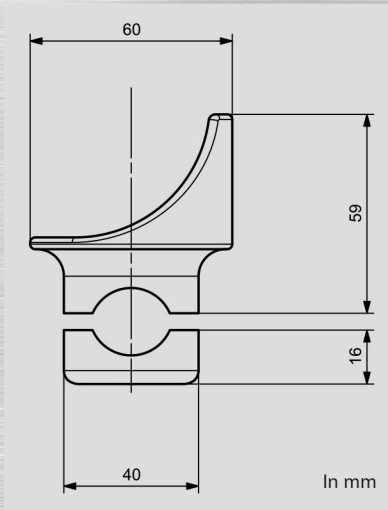

Made in France

ISIDORE is designed, developed and produced in France.

**Protect your employees, your clients,
your patients and your users...**
